Accessing A Website Or Control Panel Shows "Too Many Redirects" Error

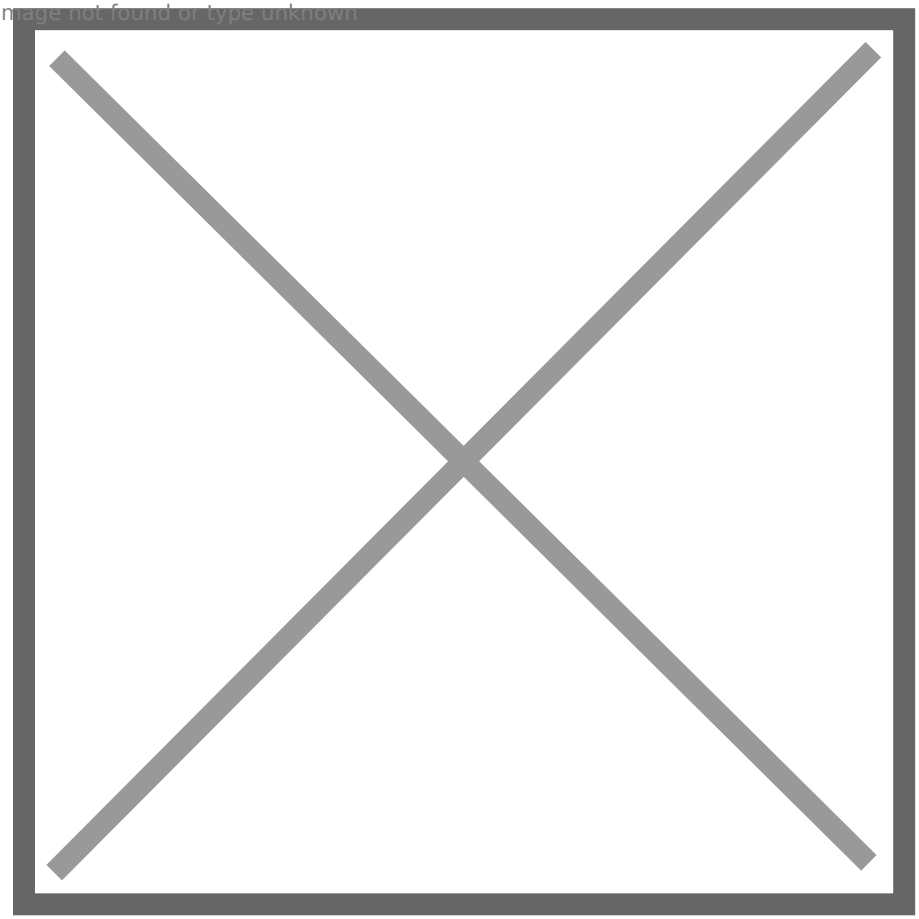

If you see this error:

Image not found or type unknown

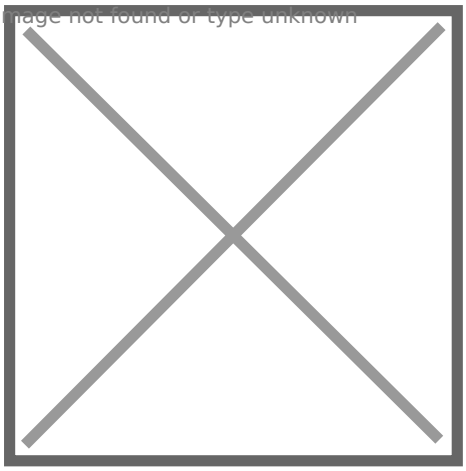

Go to CloudFlare and click your domain.

Image not found or type unknown

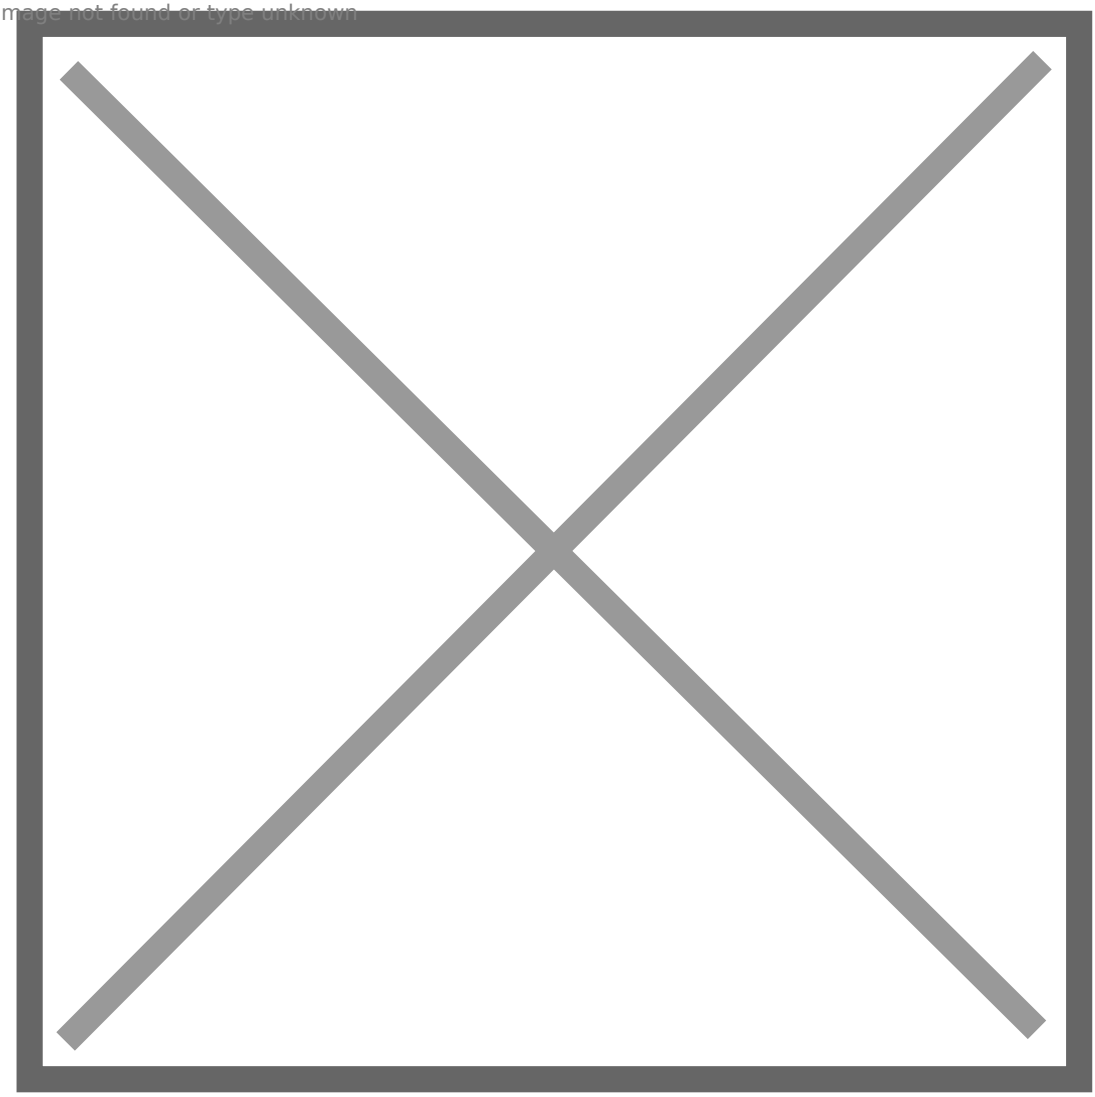

On the left hand side, expand SSL/TLS then click on "Overview".

Image not found or type unknown

Set the SSL/TLS encryption mode to "Full" instead of "Flexible".

Image not found or type unknown

Wait about 30 seconds for the change to propagate, then you should be able to access it again.
