# Subuser Account Invitation For OVH

Head over to your OVH domain where you have purchased your server from.

Make sure you use the right domain where you purchased your dedicated system from as we will need this after you have created the subuser account. OVH's login systems don't share account credentials across their databases, so if you try to login to **ca** for example it won't work if you have a system bought on **us**.

Login to your account using the My account or My customer account button situated on the header of the website.

The screenshot shows the OVHcloud website header and the login/register section. The header is dark blue with the OVHcloud logo on the left and navigation links on the right. The 'My Account' link is highlighted with a red box. Below the header, there are links for 'Bare Metal & VPS', 'Hosted Private Cloud', 'Public Cloud', 'Enterprise', 'Ecosystem', 'About', and 'OVHcloud Deals'. The main content area features the OVHcloud logo and two forms: a login form for existing customers and a registration form for new customers. The login form is highlighted with a red box.

☐ I confirm that I am at least 18 years old and accept the [Terms of Service](#) and [Privacy Policy](#)

**Create an account**

To add someone as a subuser you will have to get to your Account Settings by clicking your name in the top right corner and then clicking on your profile picture as highlighted below.

Proceed to the User Management tab and follow the step below.

Please use the provided information in your **comms-chat** channel to create the subuser account and press confirm when done.

Do not put the ID in the login box. Put the name of "Jasmine" into the box, otherwise our login becomes 29-xx/29-xx and not 29-xx/Jasmine. This happens too many times!

**You are not finished, please continue reading.**

We need the ID + the URL to actually login.

*This is a huge banner to make it as obvious as*

*possible.*

### Add user

To connect to the interface, the user will need to enter your 6969-6969-69 ID and their username separated by a '/', along with their password.

Please enter the new user information

Login

Role

Administrator

Description

After creating the subuser account **please** send the **ID** that OVH gives you right after. If you see below, it states **Example: 6969-6969-69/Jasmine**. **PROVIDE THE ID.**

 To connect to the interface, the user will need to enter your 6969-6969-69 ID and their username separated by a '/', along with their password.  
Example: 6969-6969-69/Jasmine

Additionally, make sure you inform us what domain it is, such as <https://ca.ovh.com>, <https://us.ovhcloud.com>, etc. They have around 7 different login pages. Get it from the address bar in the top left. **PROVIDE THE URL.**

# Subuser Account Invitation For Bloom.Host

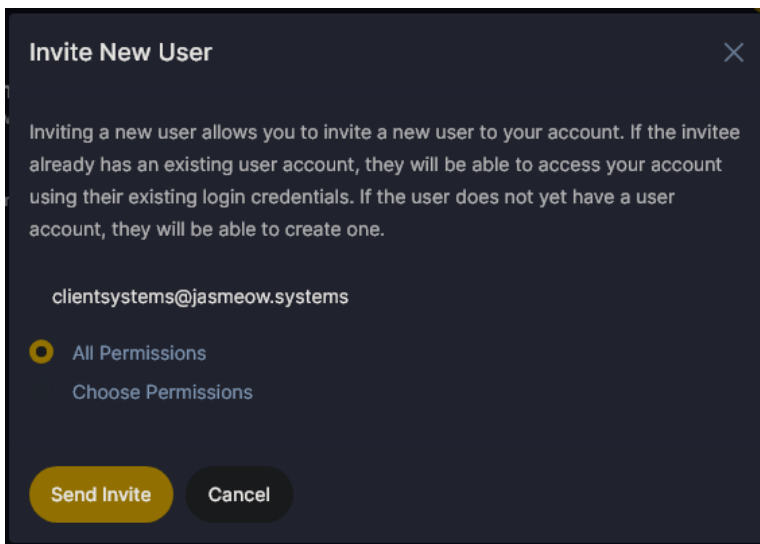

Head to Bloom.Host's website at <https://bloom.host> and click on the Billing Area in the top right.

In the top right corner, click your name, then in the dropdown, click "User Management".

Click "Invite New User" in yellow then put in our email [clientsystems@jasmeow.systems](mailto:clientsystems@jasmeow.systems) to add us.

The screenshot shows a dark-themed dialog box titled "Invite New User" with a close button (X) in the top right corner. The text inside explains the invitation process: "Inviting a new user allows you to invite a new user to your account. If the invitee already has an existing user account, they will be able to access your account using their existing login credentials. If the user does not yet have a user account, they will be able to create one." Below this text, the email address "clientsystems@jasmeow.systems" is entered. There are two radio button options: "All Permissions" (which is selected) and "Choose Permissions". At the bottom, there are two buttons: "Send Invite" (highlighted in yellow) and "Cancel" (dark grey).

Please select all permissions, but if you want to limit access, we must at least have the following as we need to see the systems, complete product password resets, use single sign-on to access the control panels for the systems and opening or viewing current support tickets. The other ones are optional and domains are not required if you don't have them. If you do choose all permissions, we can add additional system administrators who might need to login as management can add them.

We see your details in the billing area anyway such as name and address, so turning off the tick for modifying master account profile is slightly pointless as it says "Access" when this just means we can't change your name or details like that.

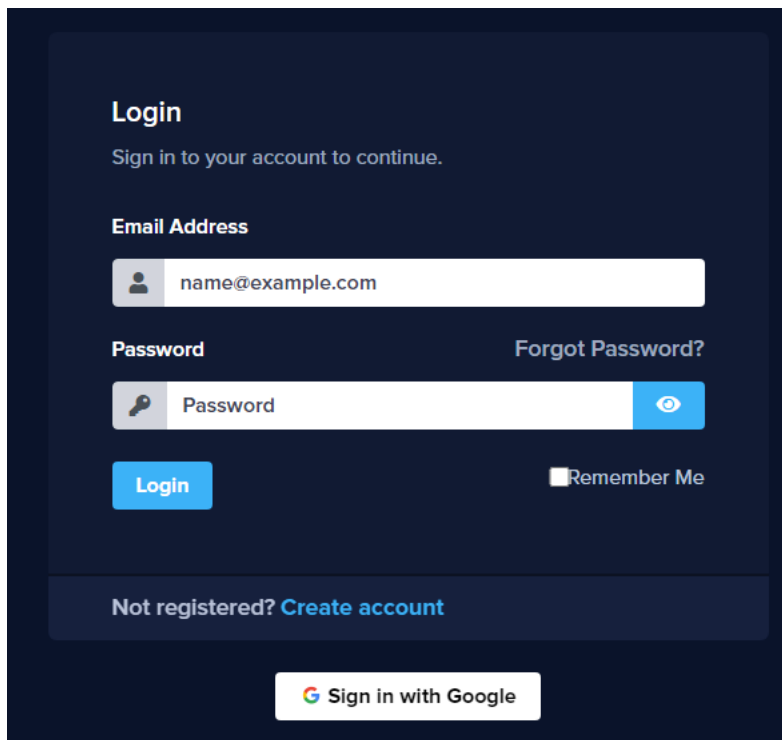

Click "Send Invite" at the bottom. We are now added and can view your account.

# Subuser Account Invitation For Hosturly

Head to Hosturly's website at <https://hosturly.com> and click "Login" in the top right to go to their Billing Area.

A dark-themed login form with a white border. It contains fields for "Email Address" (with a placeholder "name@example.com") and "Password" (with a placeholder "Password" and a toggle eye icon). There is a "Forgot Password?" link, a "Login" button, a "Remember Me" checkbox, and a "Not registered? Create account" link. At the bottom, there is a "Sign in with Google" button.

In the top right corner, click your name, then in the dropdown, click "User Management".

Click "Invite New User" in yellow then put in our email [clientsystems@jasmeow.systems](mailto:clientsystems@jasmeow.systems) to add us.

## Invite New User

Inviting a new user allows you to invite a new user to your account. If the invitee already has an existing user account, they will be able to access your account using their existing login credentials. If the user does not yet have a user account, they will be able to create one.

☒ All Permissions ☐ Choose Permissions
