Subuser Account Invitation For PebbleHost

Head to PebbleHost's website at https://pebblehost.com/ and login by hovering over "Panel Login" in the top right and clicking "Billing Panel".

Image not found or type unknown
In the top right corner, click your name, then in the dropdown, click "User Management".

Image not found or type unknown
Click "Invite New User" in yellow then put in our email clientsystems@jasmeow.systems to add us.

Invite New User

Inviting a new user allows you to invite a new user to your account. If the invitee already has an existing user account, they will be able to access your account using their existing login credentials. If the user does not yet have a user account, they will be able to create one.

clientsystems@jasmeow.systems

◉ All Permissions ○ Choose Permissions

[Send Invite]

Please select all permissions, but if you want to limit access, we must at least have the following as we need to see the systems, complete product password resets, use

single sign-on to access the control panels for the systems and opening or viewing current support tickets. The other ones are optional and domains are not required if you don't have them. If you do choose all permissions, we can add additional system administrators who might need to login as management can add them.

> We see your details in the billing area anyway such as name and address, so turning off the tick for modifying master account profile is slightly pointless as it says "Access" when this just means we can't change your name or details like that.

○ All Permissions ◉ Choose Permissions

☐ **Modify Master Account Profile -**
Access and modify the client profile information

☐ **View & Manage Contacts -**
Access and manage contacts

☑ **View Products & Services -**
View access to products, services and addons
